

THE CONNECTED IRRIGATION EXPERT

# WooBee

*Quick Installation Guide*

EN

## OVERVIEW

WooBee is an IP68 rated waterproof irrigation controller equipped with a display and operating on one 9V battery or four 1.5V AAA batteries. It is programmable by a Bluetooth connection from a smartphone/tablet or by its keyboard. It can control 1 to 6 9V latching solenoids and has a Rain sensor / Water meter input.

### 1 WooBee INSTALLATION

Unscrew the battery cap, connect the 9V battery or the 4 x 1V5 AAA battery pack.

Starting display

### CONFIGURATION OF THE BATTERY TYPE

From the «Set time» menu, you can select the type of battery used:

«9v» for a 9V battery

«AAA» for 1.5V AAA batteries

for that :

Press 4 times  to enter the setting mode / day / date / battery type

Press 7 times  to reach the choice of battery type

Choice with  
the keys  

Press the button  to confirm your choice.

Press the button  to return to the main display screen.  INFO

## FIXATION

The WooBee can be installed directly on the solenoid of the solenoid valve with its removable support on the back.

It can also be fixed on a vertical wall with its 2 fixing holes on the back.

---

## 2 WooBee OPERATION WITH BLUETOOTH

On your smartphone or tablet, go to «App Store» ou «Google Play».

Download the l'application **MySOLEM**.

## ASSOCIATION

1. Launch the application MySOLEM on your smartphone or tablet.
2. Tap on the «Add module» button or the «+» button.
3. Choose WooBee from the list of nearby controllers.

Follow the next steps described in the application.

### Notes :

- Set a name and security key for your controller and press the button «Validate».
- To identify your WooBee among the controllers available nearby, refer to the «Default name» on the label fixed to the back of the product.
- To benefit from all the features of WooBee it is recommended to create an account MySOLEM.

## PROGRAMMATION

Select the previously associated WooBee. The programming is intuitive, go into the various menus.

## SECURITY KEY

The security key protects your controller.

a/ Set key.

You can set it during the «ASSOCIATION» process or through the product information via the icon  at the top right of your screen. The key locks the keypad 1 minute after the WooBee goes to sleep.

## b/ Unlocking keypad

The manual unlocking of the WooBee keyboard is done from the keys:

**Locked keyboard**

**Press one of the keys**

**The first digit flashes**

**Press**

**The first digit is incremented or decremented**

**Press**

**Passage to the second digit**

**Repeat the last 2 operations until the 4th digit.**

**Unlocked keypad**

## c/ Disable the key

To disable the key, go to Product Information, via the icon  at the top right of your screen. Delete the key.

### 3 WooBee OPERATION WITHOUT BLUETOOTH

With its large display and keyboard WooBee can be programmed without Bluetooth.

#### Main Menu

Find the details of the configuration in the installation guide at <http://www.solem.fr> or on the MySOLEM application.

## 4 VALVES WIRING

Connect the valves with 9V latching solenoids.

## 5 SENSOR WIRING

+ S - C P 1 2 3

WooBee has a sensor input + S - to connect a rain sensor  or a water meter pre-equipped with a pulse sensor, only configurable with the mobile application MySOLEM. **By default, the sensor input is configured for the rain sensor. To change the sensor, with the application, delete the active sensor.**

+ S - C P 1 2 3

### WATER METER

If your pulse sensor is polarized, then observe the polarity when wiring :

Red wire -> +    Black wire -> -

WaterMeter

## 6 TECHNICAL SPECIFICATION

### SPECIFICATIONS :

100% waterproof (IP68 rated)  
Rain sensor or Water meter connection  
Master valve connection  
9V latching solenoid compatible  
Maximum wiring length with solenoids: 30 m  
Operating temperature: -10°C to 50°C  
2 years warranty

### POWER SUPPLY :

9V 6AM6 or 6LR61 alkaline battery  
or 4 x 1.5V AAA alkaline batteries

### OPERATION :

Bluetooth® Smart 4.0 Low Energy  
Frequency band used and maximum emitted power: [2400-2483.5]Mhz, 1mW  
Permanent backup of the programs  
Backup of the internal clock in case of power failure < 30 seconds

### DIMENSIONS :

Width : 10.5 cm (3.94 inch)  
Length : 15 cm (5.90 inch)  
Thickness : 5 cm (1.97 inch)
